WHAT IS CLAIMED IS:

- A polyester resin composition comprising an inorganic filler, polyetherimide, and a polymer containing polyethylene naphthalate in a constituent unit thereof.
- 2. The polyester resin composition of claim 1, wherein a polymerization ratio of polyethylene naphthalate constituting the polymer is 1 to 100% by mol.
- 3. The polyester resin composition of claim 1, wherein the polymer is a copolymer containing polyethylene terephthalate and polyethylene naphthalate as copolymerized components.
- 4. The polyester resin composition of claim 2, wherein the polymer is a copolymer containing polyethylene terephthalate and polyethylene naphthalate as copolymerized components.
- 5. The polyester resin composition of claim 1, wherein a content of the polyetherimide is 50 to 200 parts by mass with respect to 100 parts by mass of the inorganic filler.
- 6. The polyester resin composition of claim 2, wherein a content of the polyetherimide is 50 to 200 parts by mass with respect to 100 parts by mass of the inorganic filler.
- 7. The polyester resin composition of claim 3, wherein a content of the polyetherimide is 50 to 200 parts by mass with respect to 100 parts by mass of the inorganic filler.

- 8. The polyester resin composition of claim 1, wherein the content of the inorganic filler is 0.5 to 30% by mass with respect to the total mass of the polyester resin composition.
- 9. The polyester resin composition of claim 2, wherein the content of the inorganic filler is 0.5 to 30% by mass with respect to the total mass of the polyester resin composition.
- 10. The polyester resin composition of claim 3, wherein the content of the inorganic filler is 0.5 to 30% by mass with respect to the total mass of the polyester resin composition.
- 11. The polyester resin composition of claim 5, wherein the content of the inorganic filler is 0.5 to 30% by mass with respect to the total mass of the polyester resin composition.
- 12. The polyester resin composition of claim 1, wherein the inorganic filler is a swellable, lamellar silicate organized by an organizing agent.
- 13. The polyester resin composition of claim 2, wherein the inorganic filler is a swellable, lamellar silicate organized by an organizing agent.
- 14. The polyester resin composition of claim 3, wherein the inorganic filler is a swellable, lamellar silicate organized by an organizing agent.
- 15. The polyester resin composition of claim 5, wherein the inorganic filler is a swellable, lamellar silicate

organized by an organizing agent.

- 16. The polyester resin composition of claim 8, wherein the inorganic filler is a swellable, lamellar silicate organized by an organizing agent.
- 17. The polyester resin composition of claim 1, further comprising a heat-resistance imparting agent.
- 18. The polyester resin composition of claim 2, further comprising a heat-resistance imparting agent.
- 19. The polyester resin composition of claim 3, further comprising a heat-resistance imparting agent.
- 20. The polyester resin composition of claim 5, further comprising a heat-resistance imparting agent.
